PokeVerse art audit 4: normal vs shiny, evolution lines

Checked every Pokemon #1-493: our normal and shiny against the official sprites,
every animation frame, and every evolution line side by side.

11 wrong normal colours
9 wrong or unchanged shinies
6 animation frame bugs
33 Pokemon with no shiny (mostly legendaries)
31 evolution lines where one stage does not match (style or size)

Each card: our normal, our shiny | official normal, official shiny.
Nothing has been changed yet; you pick the fixes.

1. Wrong normal colours

Our normal does not match the official colours

Kecleon #352

normal is white, should be green (shiny also white)

ours normal | ours shiny | official normal | official shiny

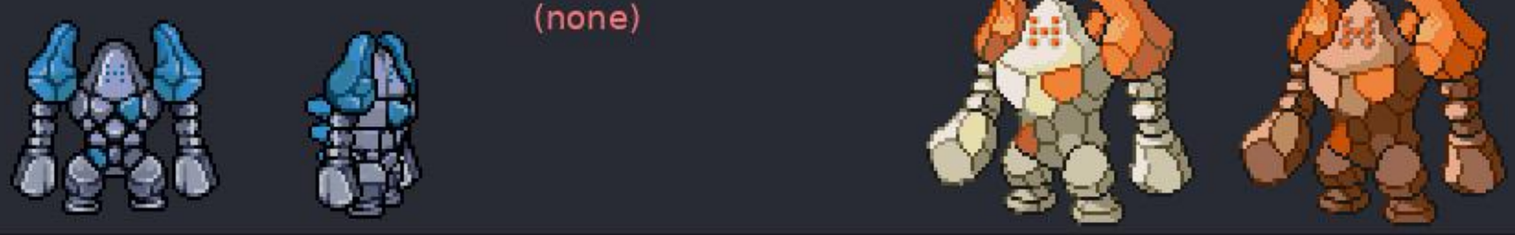

Regirock #377

normal is blue-grey, should be brown/orange

ours normal | ours shiny | official normal | official shiny

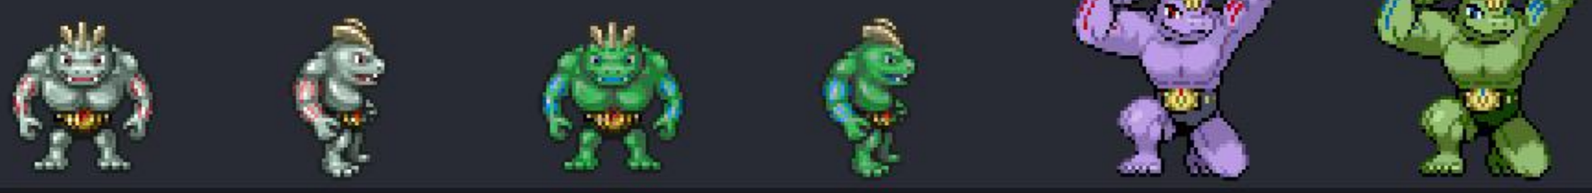

(none)

Machoke #67

normal is grey-green, should be grey-purple

ours normal | ours shiny | official normal | official shiny

Metang #375

normal is dark teal, should be blue

ours normal | ours shiny | official normal | official shiny

Metagross #376

normal is dark teal, should be blue

ours normal | ours shiny | official normal | official shiny

Tyranitar #248

normal uses the official shiny beige colours (should be green); our shiny is yellow

ours normal | ours shiny | official normal | official shiny

Toxicroak #454

normal and shiny are swapped

ours normal | ours shiny | official normal | official shiny

1. Wrong normal colours

Our normal does not match the official colours

Gliscor #472

normal black/red (should be purple); shiny black/yellow (should be blue)

ours normal | ours shiny | official normal | official shiny

Pineco #204

normal dark green, should be blue-grey

ours normal | ours shiny | official normal | official shiny

Rotom #479

red-orange, looks like Heat Rotom; should be blue-white

ours normal | ours shiny | official normal | official shiny

Regice #378

teal-green, should be light blue

ours normal | ours shiny | official normal | official shiny

2. Wrong shiny colours

Recolour is wrong, or the shiny is identical to the normal

Weezing #110 shiny is grey, should be teal-green

ours normal | ours shiny | official normal | official shiny

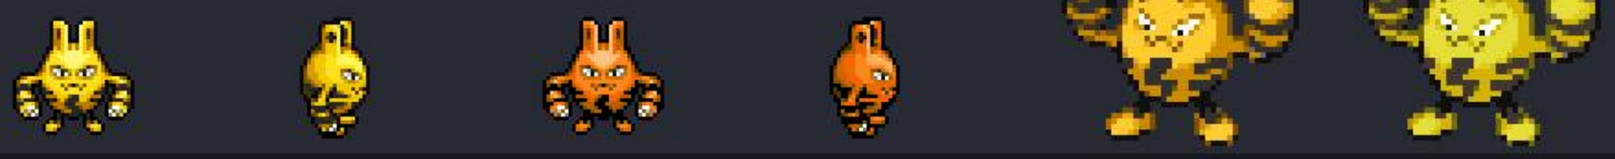

Swinub #220 shiny is blue, should be green-grey

ours normal | ours shiny | official normal | official shiny

Elekid #239 shiny is orange, should be yellow-green

ours normal | ours shiny | official normal | official shiny

Blissey #242 shiny is lavender, should stay pink (paler)

ours normal | ours shiny | official normal | official shiny

Igglybuff #174 shiny is lavender, should stay pink (paler)

ours normal | ours shiny | official normal | official shiny

Cleffa #173 shiny is purple, should be pinker

ours normal | ours shiny | official normal | official shiny

Primeape #57 shiny has no change; official has olive limbs

ours normal | ours shiny | official normal | official shiny

Baltoy #343 shiny has no change; should be yellow

ours normal | ours shiny | official normal | official shiny

2. Wrong shiny colours

Recolour is wrong, or the shiny is identical to the normal

Raichu #26 shiny has no change; should be orange-brown

ours normal ours shiny official normal official shiny

3. Animation frame bugs

All frames of the affected direction, normal then shiny

Milotic #350 frame 2 blank facing east, south and west (normal and shiny)

normal f1 normal f2 shiny f1 shiny f2

Zigzagoon #263 shiny east frame 2 is still the normal colours

normal f1 normal f2 normal f3 shiny f1 shiny f2 shiny f3

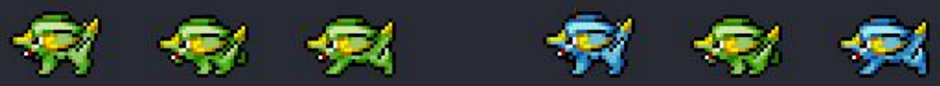

Linoone #264 shiny south frame 1 is still the normal colours

normal f1 normal f2 normal f3 shiny f1 shiny f2 shiny f3

Electrike #309 shiny west frame 2 is still the normal colours

normal f1 normal f2 normal f3 shiny f1 shiny f2 shiny f3

Electrode #101 shiny south frame 2 is nearly the normal colours

normal f1 normal f2 normal f3 shiny f1 shiny f2 shiny f3

Wurmple #265 shiny south frame has a stray line of pixels beside it

normal f1 normal f2 normal f3 shiny f1 shiny f2 shiny f3

4. Evolution lines that do not match

Facing south, frame 1, 2x zoom

Weedle is old flat art

Weedle (19px) Kakuna (24px) Beedrill (38px)

Pidgey is old flat art

Pidgey (17px) Pidgeotto (33px) Pidgeot (44px)

Spearow is old flat art

Spearow (17px) Fearow (38px)

Nidoran F is old flat art

Nidorana (21px) Nidorina (35px) Nidoqueen (48px)

Nidoran M is old flat art

Nidorano (23px) Nidorino (37px) Nidoking (47px)

Paras is old flat art

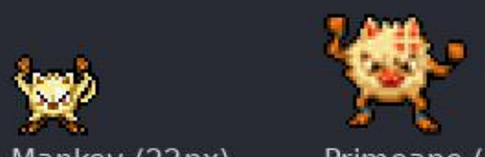

Paras (15px) Parasect (36px)

Psyduck is old flat art

Psyduck (27px) Golduck (37px)

Mankey is old flat art

Mankey (22px) Primeape (33px)

Growlithe is old flat art

Growlithe (24px) Arcanine (46px)

Tentacool is tiny flat art (23px vs 80px)

Tentacool (23px) Tentacruel (80px)

4. Evolution lines that do not match

Facing south, frame 1, 2x zoom

Shellder is old flat art

Shellder (20px)

Cloyster (39px)

Krabby is old flat art

Krabby (20px)

Kingler (49px)

Horsea and Seadra flat next to Kingdra

Horsea (21px)

Seadra (26px)

Kingdra (46px)

Dugtrio is old flat art next to the new Diglett (pack 434 matches Diglett 433)

Diglett (17px)

Dugtrio (32px)

Haunter is flat and smaller than Gastly

Gastly (36px)

Haunter (23px)

Gengar (35px)

Bellossom is flat and smaller than Gloom

Oddish (23px)

Gloom (27px)

Bellossom (22px)

Dragonite is flat next to Dratini and Dragonair

Dratini (22px)

Dragonair (46px)

Dragonite (61px)

Yanmega is flat next to Yanma

Yanma (24px)

Yanmega (40px)

Pineco is flat

Pineco (20px)

Forretress (34px)

Numel is flat

Numel (19px)

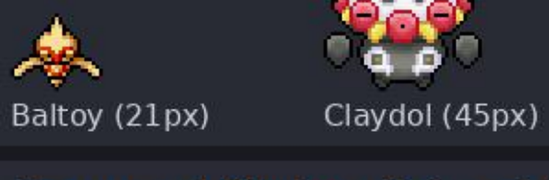

Camerupt (46px)

4. Evolution lines that do not match

Facing south, frame 1, 2x zoom

Baltoy is flat

Baltoy (21px) Claydol (45px)

Bagon and Shelgon flat next to Salamence

Bagon (23px) Shelgon (25px) Salamence (66px)

Turtwig and Grotle flat next to Torterra

Turtwig (21px) Grotle (29px) Torterra (58px)

Chimchar and Monferno flat next to Infernape

Chimchar (18px) Monferno (26px) Infernape (53px)

Croagunk is flat

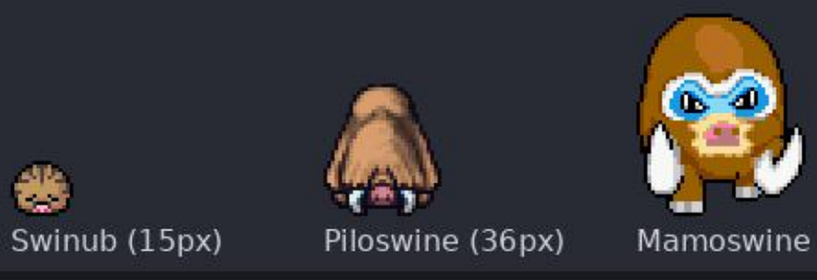

Croagunk (20px) Toxicroak (42px)

Porygon2 is flat and smaller than Porygon

Porygon (24px) Porygon2 (18px) Porygon-Z (27px)

Swinub and Mamoswine flat next to Piloswine

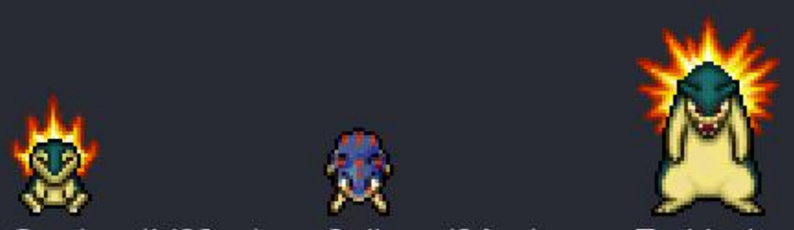

Swinub (15px) Piloswine (36px) Mamoswine (55px)

Magikarp is flat

Magikarp (20px) Gyarados (71px)

size: Quilava (24px) smaller than Cyndaquil (33px)

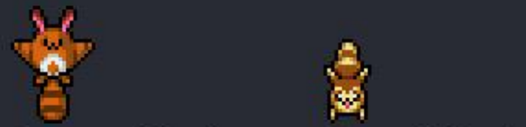

Cyndaquil (33px) Quilava (24px) Typhlosion (54px)

4. Evolution lines that do not match

Facing south, frame 1, 2x zoom

size: Furret (23px) smaller than Sentret (32px)

Sentret (32px) Furret (23px)

size: Grovyle (47px) taller than Sceptile (43px)

Treecko (23px) Grovyle (47px) Sceptile (43px)

5. Lists

No shiny at all (33):
Ariados, Unown, Snubbull, Raikou, Entei, Suicune, Lugia, Ho-Oh, Celebi, Regirock, Regice, Registeel, Latias, Latios, Kyogre, Groudon, Rayquaza, Jirachi, Deoxys, Uxie, Mesprit, Azelf, Dialga, Palkia, Heatran, Regigigas, Giratina, Cresselia, Phione, Manaphy, Darkrai, Shaymin, Arceus

Shiny slightly off (low priority):
Paras, Haunter, Cyndaquil, Togetic, Flaaffy, Phanpy, Plusle, Blaziken, Nincada, Turtwig, Weepinbell, Seadra, Gabite, Kakuna (too pale), Rapidash (flames too bright blue), Smeargle (body should be yellow)

Evolution lines that are a bit off but OK:
Rattata, Jigglypuff/Igglybuff, Ledyba, Togepi, Natu, Azurill/Marill, Bonsly, Sunkern, Wooper, Murkrow, Wynaut, Snubbull, Slugma, Remoraid, Houndoom, Phanpy, Mudkip, Lotad/Lombre, Taillow, Ralts, Slakoth/Vigoroth, Aron, Electrike, Carvanha, Wailmer, Trapinch/Vibrava, Barboach, Shuppet, Beldum, Shieldon, Bronzor, Munchlax, Magby, Smoochum, Mime Jr., Happiny, Muk, Rhyhorn, Exeggcute, Hitmonlee/Hitmontop, Electivire, Poliwag
